

How to Change the Temporary Password

Note: After having received remote support, it is advisable to change your password so that the user that took over your system cannot log back in without your permission.

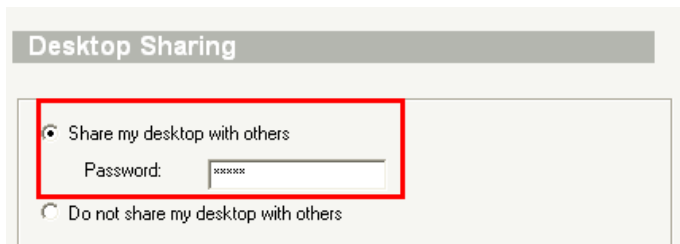

1. From the VMobility Client main menu, click on **Options + Preferences**.

2. The **Preferences** window is displayed. Select the **Desktop Sharing** category.

3. **Select Share my desktop with others** and delete the previous password then proceed to enter a different password

4. Click **Apply** and **OK** to save your changes when prompted. Once these settings are applied, a VMobility member cannot take over your system unless supply them with a password.
