

How to Password Protect the VMobility ShareFolder and UploadFolder

1. At the top of the VMobility Client, select **Options + Preferences**.

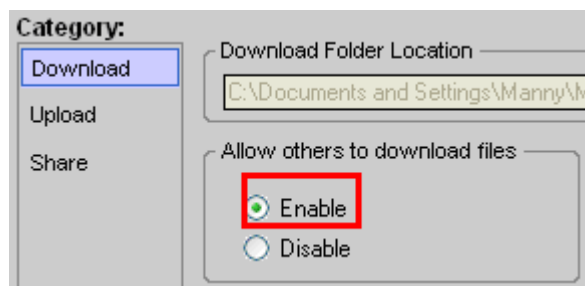

2. Under Category, select **FileSharing**.

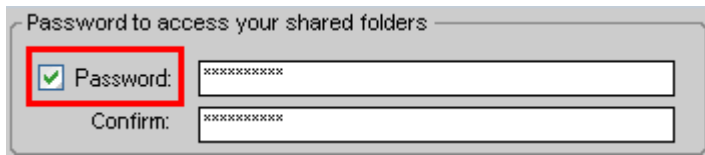

3. Under Category, select **Download**.

4. Make sure “**Enable**” is bulleted to allow others to download files.

5. Under “**Password to access your files,**” check “**Password.**”

Password to access your shared folders

Password: *****

Confirm: *****

6. Enter the password of your choice. (**Note:** The password must be 8 characters in length and less than 41 characters and also case-sensitive.)
7. Select “**Apply**” and click “**OK.**”

Note: To password protect the Upload Folder; follow the previous instructions, but select the “Upload” category.
