

How to Share Files on a PC

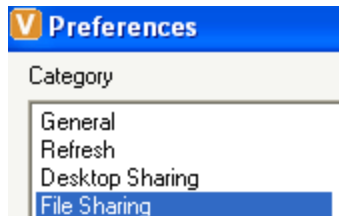

There are two methods of file sharing that will be discussed in this demo.

Method 1

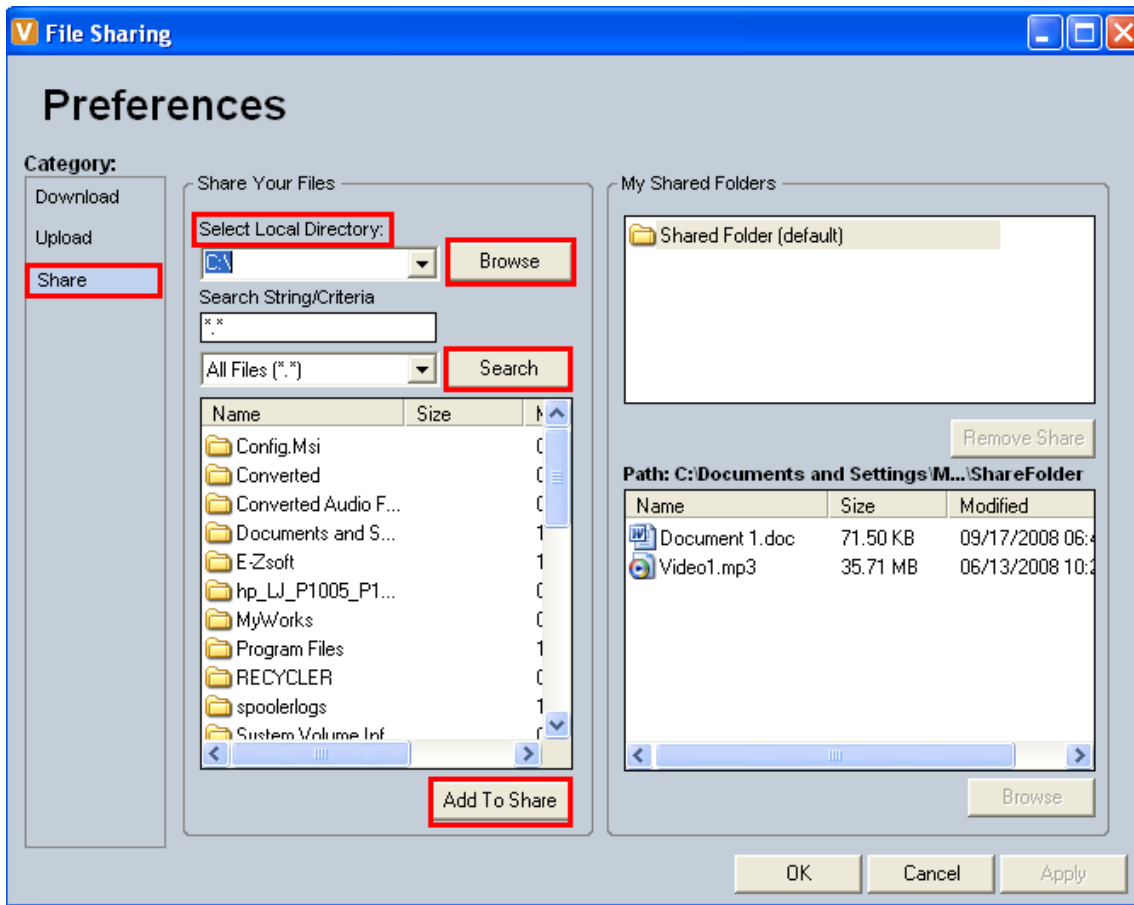

1. From the VMobility Client main menu, click on **Options + Preferences**.

2. Under Category, select **FileSharing**.

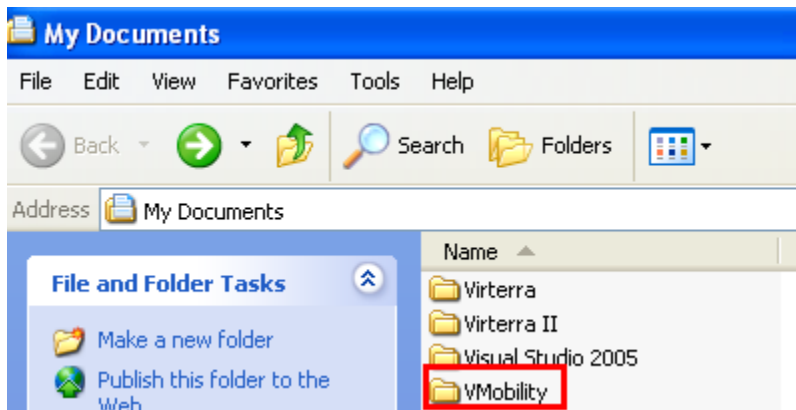

3. Click the **Browse** button and select the directory where the directories or files you want to share are located. You can also perform a **Search** for specific files using the **search criteria** and clicking on the **Search** button.
4. To add a directory to **My Shared Folders** area, select the directory from the left hand pane and then click **Add To Share** button. The selected directory will be added to **My Shared Folders** area.

5. Select **Apply** and click **OK**.

Method 2

1. Go to **“My Documents”** and select the **VMobility** Folder (This is where your VMobility **“ShareFolder”** is located)

2. Select the VMobility “**ShareFolder**”. We recommend that you copy and paste the content (documents, folders, images etc.) you want to share in the **ShareFolder**. It will be available for download.

Note: You can also drag and drop the files or folders if you want to permanently move them to the **ShareFolder**.

The VMobility ShareFolder
