

How to Upload Files to another PC

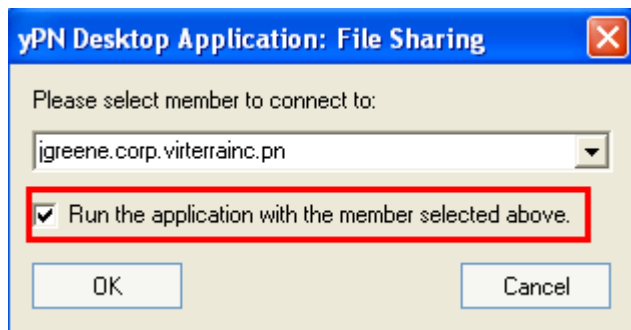

1. Select the VMobility member/PC you want to access to upload shared files. Here we are using “jgreene” as an example.

2. Click the "File Sharing" icon and click "OK."

3. A prompt will appear to attempting make a connection to the other computer. Make sure “Run the application with the member selected above” is checked.

4. Once the connection to the selected Member is established, the File Sharing window is displayed

Local Resources

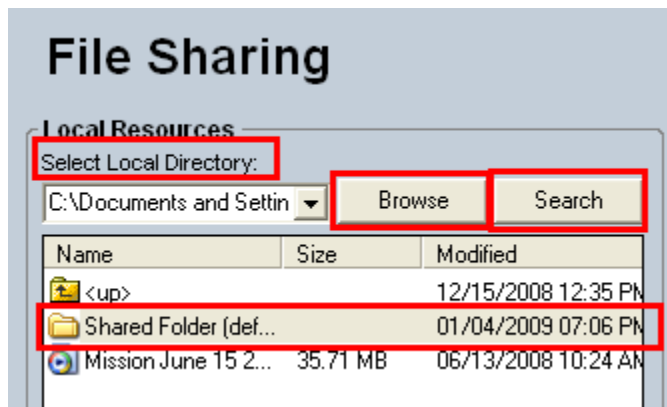

The left hand pane of the **File Sharing** window shows your Local Resources. It is the directory from where you can select files to upload to other Members.

Remote Resources

The right hand pane of the **File Sharing** window shows the remote Member's resources - its Shared Folder directory and its content.

This section contains the files and directories shared by the remote Member. You can select files and directories from this section and download them into your Local Resources directory.

5. Locate the file you want to upload by selecting, the **"Select Local Directory"** dropdown menu and choosing which Drive or you can **Browse** or **Search** for the document/file/folder.

6. Once you locate the file, click **"Upload>>"** and select **"Close"** when you are done.
